

Shale Gas Development in the Fylde

**Attractiveness
&
Consideration of Impact
on
Employment, Infrastructure & Housing Demands
and
the proposed Fylde Local Plan**

March 2017

Little Plumpton Cuadrilla “Preston New Road” Shale Gas Fracking Site - March 2017

Fig. 5

Fylde & Wyre Major Industrial Estate Locations

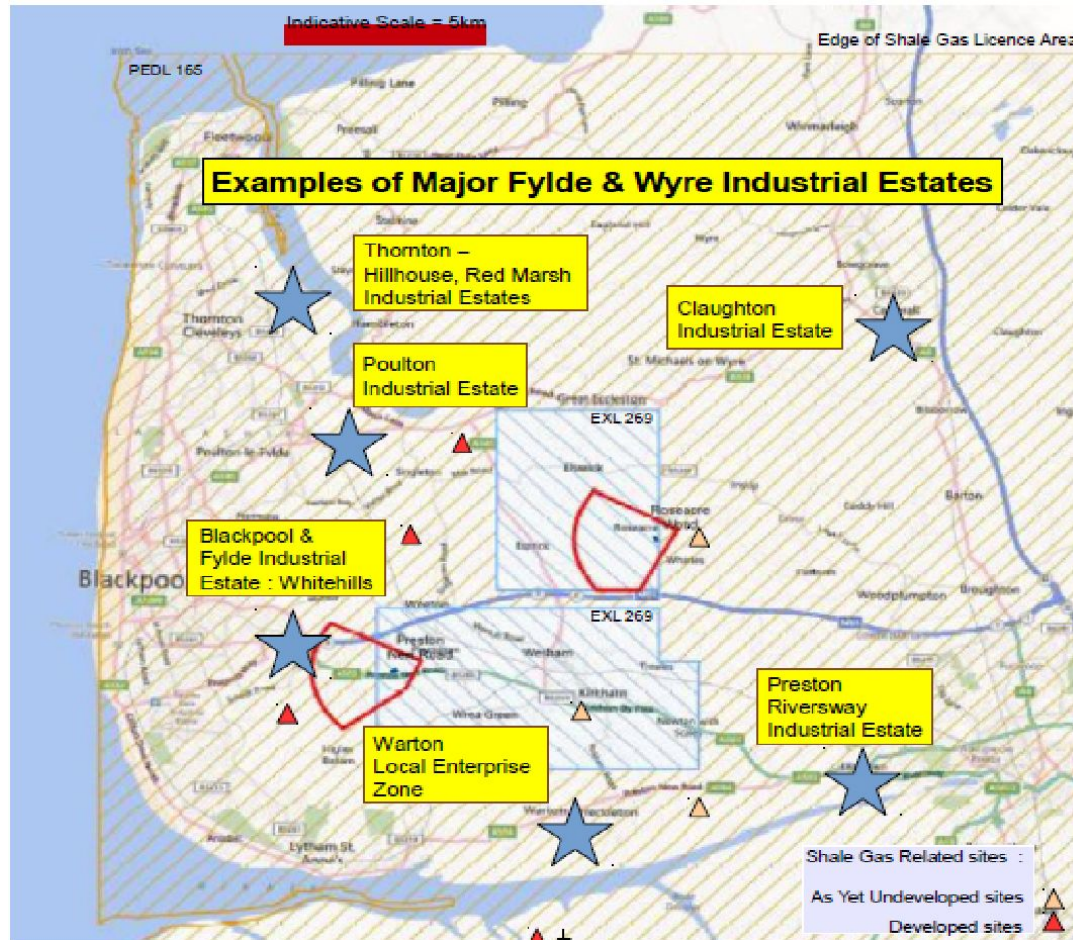

Fig.6

Safe Fracking Surface Works Sites could all be located in Major Industrial Estates approved and provisioned with utilities, transport & safety infrastructure to support Heavy Industrial Activities such as Fracking, in accord with the Local Plan. Access to Target geologies has been demonstrated up to 11km horizontal separation from the surface works in the UK.

Examples of Fracking Surface Works

Do such Heavy Industrial Developments in the Countryside Enhance
or Detract from the Attractiveness of the Fylde?

&

What are the Considerations of the Consequential Impacts on
Employment, Infrastructure & Housing Demands?

The Alternative Scenarios need to be considered in the Local Plan
