### **Key Findings**

- The Councils pattern of age distribution is significantly weighted towards the middle range age 40-59
- 

### **3.0 – Employee Relations**

The Employee Relations teams monitor casework data in terms of protected characteristics .However as the number of disciplinary, grievance and absence processes managed are relatively in small numbers, it is not possible to report statistical data in an open report as this would identify specific individuals. However, a procedure has been adopted internally to identify and review cases on a 6 monthly to identify any patterns that may indicate discriminatory practices.
