Quality at Every Kerb

As work continues across the St Annes Improvements project, the materials being used reflect the long-term investment being made in the town centre:

- **Kellen block** paving with a bespoke architectural finish has been used throughout the Square, Pier Link and Garden Street schemes
- On the **Pier Link**, the conservation kerb line features a bespoke concrete finish, while kerbs near Allegria have been lifted, cleaned and reused as the planters are repositioned to widen the footpath
- **Existing stone kerbs** on St Annes Road West have been retained, preserving the character of the streetscape
- **Lifted flags** are being stored for future use, with some already reused for patching works
- On **Garden Street**, 'sawn and flamed' finish Portuguese granite kerbs, planters and benches are soon to be installed, significantly enhancing the aesthetic appeal of the area
